

ZINC AIR

FOR **HEARING
AID**

PR10

PR13

PR312

PR675

UNIQUE COMPOSITION

Zinc air batteries are unique within the Panasonic range, as only one of the active materials is inside the battery. When tearing off the tab, oxygen enters and activates the battery.

HIGHEST ENERGY DENSITY

With the highest energy density of all electrochemical systems and due to their small size, these batteries are excellent to power small energy-hungry devices in need of continuous discharge.

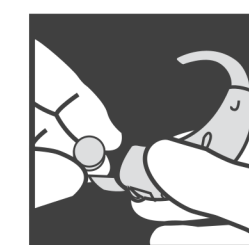

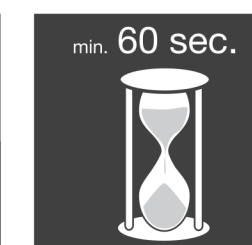

Specifications:

BLISTERS

Model N°	CSU EAN	Re-order N°	Batteries/ Blister	Blisters/ Innercarton	Innercartons/ Bundle
PR10 (PR230/PR536)	5410853057024	PR-10L/6LB	6	10	5
PR13 (PR48)	5410853057017	PR-13/6LB	6	10	5
PR312 (PR41)	5410853057031	PR-312/6LB	6	10	5
PR675 (PR44)	5410853057048	PR-675/6LB	6	10	5

Compact sized blisters. Easy to stow away; fits in purse or wallet.

USER GUIDELINES:

ZINC AIR
is suitable for:

LONGER PERFORMANCE

Designed to provide longer lasting performance in appliances

NEW GENERATION

Excellent for the latest generation of Bluetooth hearing aids

VARIOUS TEMPERATURE CONDITIONS

The battery gives a reliable power in various temperature conditions to enjoy outdoor activities longer.

STEADY HIGH PERFORMANCE LEVEL

The energy stays the best at all time in this light weight battery.
